DE LAVAL CENTRIFUGAL PUMPS

are built for all capacities, all heads, and all classes of service. They are made both single-stage and multi-stage and with horizontal and vertical shafts. They are so constructed that all internal parts are accessible for inspection or replacement upon lifting the casing cover and without disturbing suction or discharge connections.

All parts subject to wear are made to limit gages on an interchangeable basis and are quickly and easily renewable. Efficiencies are guaranteed, and every pump is tested at the factory and a copy of the test report is supplied to the purchaser.

CROWELL

ROTARY

VACUUM PUMPS AIR COMPRESSORS
POSITIVE PRESSURE BLOWERS

The total absence of valves, springs, gears or unbalanced parts gives trouble-free operation. Our customers state that their Crowells run for years without attention other than what any machine will require to keep it in condition.

Economical in floor space and power. Made in ten standard sizes from 2 to 400 cu. ft. per minute capacity, for pressures up to 25 lbs. or a vacuum of 29″ to 30″.

"A Word to the Wise"

Buyers will often save time

by applying first to those concerns who advertise their products in this Register.

The products advertised are those for which there is a *National* demand and are generally the best of their kind.

Products not advertised often have only a *local* sale, beyond which demand is not sought for them.

COLUMBIAN
ROPE AND TWINE

The fine appearance of COLUMBIAN Rope and Twine is a good standard by which the quality of these products may be judged.

The high grade of fibre, the modern machinery on which they are made, the care and skill employed in their manufacture, all contribute toward making them real Quality Products.

These same factors are, in COLUMBIAN Products, the true reasons for their fine appearance.

Our COLUMBIAN brand we firmly believe to be the most economical brand of cordage on the market, taking into consideration the elements of price, strength, length, and durability.

Our EUREKA brand is the quality second to COLUMBIAN, but often found equal to brands offered as first grade.

Die Stocks — "Beaver" Easy-Worker

With Beaver "Easy-Workers" one man can thread up to 12-inch pipe. Iron or steel. "Beavers" are compact, sturdy "one-piece" tools, without loose bushings or extra dies. (Except in largest sizes) Saves changing dies. Can't lose parts. You buy one set of dies—not four. Adjustable to cut special threads. Sold on trial by leading jobbers.
